EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Mark P. Watson on April 5, 2006.

The application has been amended as follows:

Claim 7, line 17, after the first instance of "the" please insert -- selected --.

2. The following is an examiner's statement of reasons for allowance:

Claim 7 recites among other things, selection circuitry, including a first multiplexer and a second multiplexer wherein the first multiplexer selects data from a plurality of peripherals and the second multiplexer selects from data from a display panel and the selected data from a plurality of peripherals.

Yamamoto discloses a graphics controller comprising a memory region 402 configured to store image data for display on a display panel in communication with the graphics controller (Figure 4 and col. 5, lines 57-64), interface circuitry modules 310 and 510 respectively, where each of the interface circuitry modules is configured to transmit data from the graphics controller over a set of shared data lines (Figures 3 and 5), selection circuitry configured to select data from one of the interface circuitry modules for transmission over the set of shared data lines and line sharing circuitry configured to inform each of the interface circuitry modules to transmit control data 404-407 (Figure

4), the line sharing circuitry further configured to generate select signals for the selection circuitry, the select signals enabling the selection circuitry to select the data from one of the interface circuitry modules 403 (Figure 4).

Yamamoto does not disclose selection circuitry, including a first multiplexer and a second multiplexer wherein the first multiplexer selects data from a plurality of peripherals and the second multiplexer selects from data from a display panel and the selected data from a plurality of peripherals.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
